Cloud Presentation Suite
Overview

FSK/Serial Communication

- Run multiple servers and connect with a single client

Cloud Server

:COM$_1$
Instance #1
:10001

:COM$_2$
Instance #2
:10002

- Connect multiple ceilometers to each Cloud Server instance

- Each instance will have its own listening port and requires its own communication interface

TCP/IP

- Possible to register each incoming telegram (matrix printer preferred)

Data Storage

Local or Network Disk

LAN / Internet

- Connect clients from local network, over internet or private networks.

- New messages are sent (via socket communication) to all connected clients (Cloud Presentation) immediately when received at server (Cloud Server)

TCP/IP

Cloud History

Open stored data file(s)

- Cloud History looks at stored data (stored by Cloud Server) for analysis.

TCP/IP

Cloud Presentation

:X$_1$
Client #1
Connected to a single Server instance

Cloud Presentation

:X$_1$:X$_2$
Client #2, 3
Connected to both Server instances

- Possible to print graphical data
